

Jury Report 2nd nomination CSA 2011 BU Production

*Joint Forces Powerplant Services
(Maintenance, repair and modifications
on boiler and static equipment)*

Joint Forces Powerplant Services has been nominated for the final three and based on score they finished on a second place for the Essent BU Production Contractor Safety Award in the category "big suppliers" (more than 10.000 worked hours on site).

Joint Forces has both in the local as in the central Contractor Safety Board a major role and is very active in helping to optimize our processes and procedures and therefore helped continuously improving them. Through this proactive but also critical attitude, commitment and a visible initiative on HSE, there are no accidents and incidents occurred during the often risky activities within the power plants of the BU Production.

Despite their motivated commitment to HSE and quality the total score of Joint Forces Powerplant Services was not sufficient to become the winner of the Contractor Safety Award 2011.
